Effective: 201709291600 UTC

CIVIL AVIATION SAFETY REGULATION (CASR) PART 175: AERONAUTICAL DATA ORIGINATOR RESPONSIBILITIES

1. INTRODUCTION

- 1.1 CASR Part 175 requires that Airservices hold and maintain current contact details of Aerodrome (AD)/Aircraft Landing Area (ALA)/Helicopter Landing Site (HLS) owner/operators. Such owner/operators are required to register with Airservices and nominate a person responsible (otherwise referred to as an Aeronautical Data Originator or ADO) for informing Airservices of this information, carrying out regular reviews and updating this information with any changes.
- 1.2 An ADO to register must obtain a Data Product Specification (DPS) from Airservices. This ensures aeronautical data associated with the AD/ALA/HLS is exchanged through a quality controlled process. The DPS provides assurance that information published on behalf of AD/ALA/HLS owner/operators, by Airservices, is current and has a high level of integrity and reliability.

2. BACKGROUND

- 2.1 Prior to the introduction of CASR Part 175, the process for collecting and maintaining aeronautical data was not as robust. As a result there are a significant number of locations where legacy data is still in place as there is no ADO registered with Airservices.
-

- 2.2 Airservices has been undertaking “best efforts” to identify ADOs for over 2000 AD/ALA/HLS where there are no contact details currently available. As part of this effort, assistance was provided by the RFDS and other organisations involved in servicing remote communities, with some success. Airservices has now exhausted all reasonable avenues of enquiry in relation to the identification of the remaining ADOs.

3. INDUSTRY NOTIFICATION

- 3.1 This AIC is advising industry of the 2000+ AD/ALA/HLS that remain “unverified” without a registered ADO.
- 3.2 In consultation with CASA the following actions will occur:
- Owner/operators of the AD/ALA/HLS listed in the Appendices of this AIC will have 90 days from the date of this AIC to contact Airservices to register as the ADO and provide the information required in the relevant DPS for their AD/ALA/HLS.
 - After the 90 days, Airservices will issue an AIP SUP advising industry of the intention to remove any reference to any remaining AD/ALA/HLS, without a registered ADO, from all IAIP products in a future amendment to be advised (Refer CASR Part 175.140).

Registration details can be found:

<http://www.airservicesaustralia.com/services/aeronautical-information-and-management-services/aeronautical-data-originator-responsibilities/>

Note: Part 175 requires that Airservices only accepts data/information from the registered ADO. As such, reports or information from individuals who are not the registered ADO cannot be used as verified data or published in the IAIP.

4. CANCELLATION

- 4.1 This AIC will self cancel on 04 January 2018.

5. DISTRIBUTION

- 5.1 By Airservices Australia website only
-

Appendices

Note: all locations are listed in Y-CODE order (not aerodrome name), bookmarks can be used to navigate to the relevant state.

1. AD/ALA/HLS in South Australia
 2. AD/ALA/HLS in Western Australia
 3. AD/ALA/HLS in the Northern Territory
 4. AD/ALA/HLS in Tasmania
 5. AD/ALA/HLS in Victoria
 6. AD/ALA/HLS in Queensland
 7. AD/ALA/HLS in New South Wales
 8. AD/ALA/HLS in the Australian Capital Territory
 9. AD/ALA/HLS in other locations
-

**Appendix 1 TO
(AIC H29/17)**
