Scale 1:250,000

CAUTION

USE IN OPERATIONS ONLY AFTER CHECKING-
1. CURRENCY OF CHARTS
2. AIP SUPPLEMENT AND NOTAM
3. FOR ADDITIONAL SPECIAL USE AIRSPACE AND RADIO NAVIGATION INFORMATION SEE AIP/ERSA
4. FOR COMMUNICATIONS INFORMATION SEE ERSA

WARNING

Spot elevations, which denote ground level, not tree-top height, may not indicate the maximum elevation of land in any area. The highest spot elevation in each 10 minute graticule square is depicted in bold type. Spot elevations enclosed by brackets (±) indicate the highest elevation of terrain (not surveyed) based on best available contour information.
Hypsometric information is accurate to the extent of the surveys available, and should be accepted only as indicative of elevation and used with caution.

OBSTACLES
Numerals in italics indicate elevation above sea level of top of mast or obstacle. Height above ground is shown in upright type within parentheses. Structures above 360ft are shown on this chart. Due to reporting requirements, structures up to 360 ft AGL may exist which are not shown on this chart.
VERIFIED OBSTACLES - meet horizontal and vertical accuracy requirements according to ICAO Area 1 standards.
UNVERIFIED OBSTACLES - exist at the location, but not all horizontal and vertical accuracy requirements according to ICAO standards have been met.
