LOCAL TRAFFIC REGULATIONS

1. RWY 14 - ACFT ABV 136,000KG landing RWY 14 must roll through and exit RWY via TWY K to avoid pavement damage from heavy braking. ACFT BLW 136,000KG landing RWY 14 can exist via TWY D if heavy braking not required.
2. All aircraft must provide their parked position/gate number to ATC on acknowledgement of airways clearance.
3. Pilots are encouraged to request “detailed taxi guidance” prior to landing or taxiing for departure or request follow-me service once on ground frequency if unsure of parking bay.
4. Runway Incursion Hotspots
   4.1. RWY 17/35 at TWY B (Holding Point B RWY 17 is very close to the gable line for RWY 14).
   4.2. RWY 35 after landing RWY 32 (RWY 35 often mistaken for an angled RWY).
5. LOCAL HELICOPTER OPS are to be conducted on the Western Grass which is the area contained by the blue gable markers to the west of RWY14/32 and north of the VOR. The Western Grass is not a designated helicopter landing site and separation is not provided between aircraft and/or obstructions on the ground while operating within the confines of the Western Grass. Upwind and final legs of Western Grass circuit operations are to be conducted parallel to RWY 14/32 unless otherwise approved by ATC.
6. TRAINING and AIRWORK FLIGHTS
   a. Circuit training see noise abatement
   b. Pilots must contact Gold Coast Tower on 07 5599 5990^, at least 60 MIN prior to commencing the session, to book circuit training.
   c. IAL training approval shall be obtained from the Network Coordination Centre (NCC) Phone: 1800 020 626^. ILS training for ACFT BLW 5,700KG MTOW will not be approved outside 0900-1700 LMT. Pilots must contact Brisbane Centre 07 3866 3694^ for AWK ABV 1,500FT.
   d. NDB - A and VOR - A approaches will not normally be approved.
   e. Training operations contrary to the prevailing traffic pattern/operational runway direction will not normally be approved.
7. Occasionally, TCAS advisories for ACFT operating in Gold Coast Terminal Control Area may occur due ATC procedures affecting VFR ACFT.
8. Pilots planned to BN must obtain a slot time for Brisbane prior to engine start, in accordance with BN INTL Air Traffic Flow Management Procedures (See BRISBANE INTL entry).
9. Pilots should ensure flight plan details are submitted for flight in Gold Coast Class C airspace, preferably through NAIPS or Flightwatch, well in advance of requesting SSR code allocation. Failure to do so will result in delays for airways clearance. The SSR code request is to be made on the appropriate FIA frequency. Pilots who are squawking an assigned discrete code may call Gold Coast TWR on 118.7 directly for airways clearance at or BLW 1,500FT.

10. Flights planned to depart Gold Coast above 6,000FT can expect airways clearance at 6,000FT. Higher levels can be anticipated on APP CTL FREQ.

11. Turboprop ACFT are not to perform engine ground runs on the GA APN.

12. **PARKING**

   Overnight parking is no longer AVBL for all aircraft above 5,700KG MTOW, except for RPT aircraft. Itinerant parking requirements is available for 2HR or less, this will require prior approval FM airport management with a MNM notice of one clear working day (MON to FRI). Itinerant ACFT under 5,700KG must park north of TWY G, at the northern end of the GA APN.

13. **TWY K DEPARTURES**

   ACFT departing RWY 32 must use TWY K intersection for departure.

14. For CASA approved operators, RWY 14/32 is capable of supporting takeoffs with a RWY VIS of not less than 550M.

15. No HEL air taxi on the GA APN. HEL OPS limited to aiming point and HEL PRKG area only.

**FLIGHT PROCEDURES**

1. **ATC TRAFFIC MANAGEMENT SPEED**

   When not on a SID or STAR (including vectoring) - ACFT ARR or DEP CG must not exceed 250KT IAS when BLW 10,000FT AMSL. Advise ATC if a higher speed is operationally required.

2. Circuits from the Western Grass are to be conducted with upwind legs to remain inside the airport boundary fence and base turns to be made within the RWY14/32 threshold markers.

3. **COASTAL TRANSIT IN CLASS G AIRSPACE**

   Due to high density traffic in coastal Class G Airspace between Cudgen Headland and Hastings Point, fly:
   a. Southbound 1,000FT AMSL
   b. Northbound 500FT AMSL

   **Concentrated TFC BTN Gold Coast and Southport at 500FT, see also SOUTHPORT CTAF procedures.**

4. Aircraft requiring a transit of the GC CTR should plan to track via the VFR route depicted on the VTC as follows:
   - Northbound transit via the highway (inland) and contact Tower 118.7 approaching Cudgen Lake for ATC clearance.
   - Southbound transit via the highway (inland) and contact Tower 118.7 approaching Robina Town Centre for ATC clearance. Aircraft requiring to transit the CTR coastal may experience delays due high density traffic.

**CTAF - AFRU 118.7**

Outside TWR HR.

**NOISE ABATEMENT PROCEDURES**

1. A Curfew and Noise Abatement Procedures apply. See AIP DAP.

2. The preferred RWY for takeoff and landing is RWY 14.

3. Circuit training:
   a. Not permitted BTN 1200-2000;
   b. Where possible circuits should be distributed equally left and right of the RWY in use.

4. Preferred flight paths for turbojet and non turbojet ACFT ABV 5,700KG MTOW are contained in AIP DAP.

5. Outside TWR HR pilots are requested to use the same RWY for DEP and ARR - if operationally acceptable.

6. **RWY 14 INSTR APCH PROC for turbojet and non turbojet ACFT ABV 5,700KG MTOW - noise preferred RWY 14 APCH:**
   a. RNAV-W (RNP) RWY 14, RNAV-Y (RNP) RWY 14
   b. RNAV-Z (GNSS) RWY 14
   c. ILS RWY 14 (training and recency not permitted).

   To minimise noise, NDB or VOR RWY 14 only AVBL when operationally RQ.
ADDITIONAL INFORMATION
