

**Procedures for Air Navigation Services – Aeronautical Information Management
(PANS-AIM, Doc 10066)**

1st Edition, Amendment 2

Reference	State Reference	Level of implementation	Details of Difference	Comments
ASHTAM	CASR 1998 Division 175.100	Different in character or other means of compliance	Australia uses NOTAM for volcanic ash advisory notifications.	N/A
SNOWTAM	CASR 1998 Division 175.100	Less protective or partially implemented or not implemented	Australia does not produce SNOWTAMs due to the environmental conditions of the country. In the event of snow or standing water on a runway, a NOTAM is issued.	N/A
5.2.1.1.1	CASR 1998 Division 175.105	Different in character or other means of compliance	The headings for the AIP are provided in the AIP, however the section may reference where the relevant information is published in another product (ERSA, DAP and DAH). The structure of the DAH combined air routes (AIP ENR 3.1 to 3.3) will remain combined until the information is relocated into the relevant ENR sections.	Australia is assessing means of compliance
5.2.1.1.3 a) - r)	CASR 1998 Division 175.100	Less protective or partially implemented or not implemented	Australia does not produce this data product	Australia is assessing means of compliance
5.2.1.1.4 a) - c)	CASR 1998 Division 175.100	Less protective or partially implemented or not implemented	Obstacle Data available on request	N/A
5.2.1.2.13 b)	CASR 1998 Division 175.100	Different in character or other means of compliance	DAP & AIP charts have different sizes	N/A
5.2.1.4.4	CASR 1998 Division 175.100	Different in character or other means of compliance	AIC/AIP SUP Summary is published monthly on the Airservices website	N/A

5.2.1.4.5	CASR 1998 Division 175.100	Different in character or other means of compliance	Each page has the SUP number and year	Publication date shown on the website
5.2.2.2 a) - f)	CASR 1998 Division 175.100	Less protective or partially implemented or not implemented	No national plan due to few aerodromes affected	N/A
5.2.2.9	CASR 1998 Division 175.100	Different in character or other means of compliance	AIC/AIP SUP Summary is published monthly on the Airservices website	Published monthly via website only
5.2.3.1.14	CASR 1998 Division 175.100	Different in character or other means of compliance	AIP SUP available via website only	N/A
5.2.3.1.15	CASR 1998 Division 175.100	Different in character or other means of compliance	AIP SUP available via website only	Paper AIC/SUP are not issued
5.2.3.1.16	CASR 1998 Division 175.100	Different in character or other means of compliance	AIP SUP available via website only	Paper AIC/SUP are not issued
5.2.3.2.1	CASR 1998 Division 175.100	Different in character or other means of compliance	AIC available via website only	N/A
5.2.3.2.2 a) - e)	CASR 1998 Division 175.100	Different in character or other means of compliance	AIC available via website only	N/A
5.2.5.1.2	CASR 1998 Division 175.105	Different in character or other means of compliance	Australia is using free text and based on limited abbreviations from Doc 8400 (as published in AIP).	Australia is accessing means of compliance to reflect the correct ICAO uniform abbreviated phraseology.
5.2.5.1.4	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Information about snow or standing water on the movement area is disseminated in NOTAM or the runway is closed through NOTAM.	A risk-based approach to GRF implementation is currently underway with appropriate changes to be made to CASR Part 139, 172, 175 and the CASR Dictionary.

5.2.5.1.5	CASR 1998 Division 175.105	Different in character or other means of compliance	Volcanic Ash Advisories, if required, are issued by the Darwin Volcanic Ash Advisory Centre SIGMET for volcanic ash clouds are issued for the whole of Melbourne and Brisbane FIRs	Australia does not use ASHTAM's. If an event as listed requires one then a NOTAM will be issued
5.2.5.3.3	CASR 1998 Division 175.105	Different in character or other means of compliance	Australian NOTAM Checklist does not list individual AIP Amendments, AIP Supplements, data sets or AIC, but instead includes the webpage at which they can be accessed	N/A
5.3.1.5 c) - d)	CASR 1998 Division 175.190	Less protective or partially implemented or not implemented	There is no specific metadata identified in datasets, and the data is valid for the AIRAC intended (temporality not included in dataset)	N/A
5.3.3.1.1 i) - j)	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Australia does not collect FATO data	N/A
5.3.3.1.2	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Australia does not use the term not applicable for unknown elements of data.	N/A
5.3.3.2 a) - g)	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Australia currently does not produce this dataset. Obstacle data is available on request.	N/A
5.3.3.2.1.1	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Terrain Data is available from Geoscience Australia	Australia is assessing means of compliance.
5.3.3.2.1.2	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Terrain Data is available from Geoscience Australia	Australia is assessing means of compliance.
5.3.3.2.1.3	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Terrain Data is available from Geoscience Australia	Australia is assessing means of compliance.
5.3.3.2.1.4	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Terrain Data is available from Geoscience Australia	Australia is assessing means of compliance.

5.3.3.2.2.4 a) - c)	CASR 1998 Division 175.105	Different in character or other means of compliance	Australia is concentrating on Area 2a, 2b and 2c.	a) Area 2d encompass a different product. Product does not currently indicate which area is affected. b) The take-off flight path area s covered in the area 2b data within 10km c) The OLS area is covered in the 30NM Obstacle Products
5.3.3.3 a) - e)	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Australia does not produce this data product	Assessing means of compliance
5.3.3.3.1.1	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Australia does not produce this data product	Assessing means of compliance
5.3.3.4.1 f)	CASR 1998 Division 175.105	Less protective or partially implemented or not implemented	Helicopter coding tables are available on request	Assessing means of compliance
6.1.4.3	CASR 1998 Division 175.105	Different in character or other means of compliance	Airspace published in the DAH or AIP SUP requires 8 hours notification times	N/A
6.1.4.4	CASR 1998 Division 175.105	Different in character or other means of compliance	Publications cycles in Australia takes longer than three months, the information is incorporated into the next publication.	N/A
6.1.4.5	CASR 1998 Division 175.105	Different in character or other means of compliance	SUP is currently not used for long duration temporary information.	Australia is assessing means of compliance.
6.1.4.6	CASR 1998 Division 175.105	Different in character or other means of compliance	SUP is currently not used for long duration temporary information.	Australia is assessing means of compliance.
