# CHANGES TO AIP AERONAUTICAL CHARTS EFFECTIVE 15 JUNE 2023

## 1. INTRODUCTION

- 1.1 This AIC cancels and replaces AIC H32/22 on 15 June 2023.
- 1.2 This AIC identifies significant changes incorporated in AIP Charts that become effective on 15 June 2023. Amendments are listed in sufficient detail to allow easy identification on the charts.
- 1.3 The Latitude and Longitude (LAT/LONG) in this document is shown to an accuracy defined by the source information. If the LAT/LONG is shown as 1824S 15122E the position has been defined to the nearest minute; if the LAT/LONG is shown as 1824.2S 15122.4E the position has been defined to the nearest tenth of a minute. If the LAT/LONG is shown as 182412S 1512224E the position has been defined to the nearest second.
- 1.4 While every effort is made by Airservices to ensure the accuracy of international data contained in Airservices' charts and publications, international data is based on, or contains, information provided from regional governments or third party sources over which Airservices has no control, and which may not always be completely up to date.
- 1.5 Changes of a purely editorial nature are not listed, and changes which are the subject of NOTAM or SUP may not be included. Refer to current NOTAM and SUP for latest operational information.
- 1.6 Advice of any incorrect information on the charts or suggestions regarding AIP Charts should be forwarded to AIS via email: [docs.amend@airservicesaustralia.com](mailto:docs.amend@airservicesaustralia.com)
