**AERODROME FORECAST (TAF)
BOUNDARY CHANGE****1. INTRODUCTION**

- 1.1 The Bureau of Meteorology is changing the Aerodrome Forecast (TAF) boundary from 5NM to 8KM.

2. BACKGROUND

- 2.1 In Australia, forecasts of weather phenomena in TAF are for the area at the aerodrome, that is the area within a radius of 8KM of the Aerodrome Reference Point (ARP).
- 2.2 This change will allow the Bureau of Meteorology to align TAF coverage area to the current METAR/SPECI boundary.
- 2.3 This change conforms with ICAO requirements.

3. AMENDMENTS TO AIP

- 3.1 *AIP GEN 3.5 para 4.8* Aerodrome Forecast (TAF).

TAF are a statement of meteorological conditions expected for a specified period in the airspace within a radius of 8KM of the ARP.

4. CANCELLATION

- 4.1 This SUP will be cancelled when it is incorporated into AIP, expected to be in AIP Amendment 119, effective 13 June 2024.

5. DISTRIBUTION

- 5.1 Airservices Australia website only.
