1 User Preferred Routes

This manual provides aircraft operators with the requirements for planning User Preferred Routes (UPRs). Aircraft operators may use a combination of published ATS routes and UPR segments, however requirements in this manual must be adhered to in toto.

Appendices are provided at the back of this manual and are referred to throughout to assist operators by providing a visual representation of more complex flight planning requirements.

1.1 Aircraft Equipment Requirements

Aircraft operating on UPRs must have the following equipment and navigation approvals:

Within CTA Airspace	Within OCA Airspace
<ul style="list-style-type: none"> a) INS/IRS; b) GNSS; c) RVSM Approved; d) ADS-B; and e) At least one of the following navigation approvals: <ul style="list-style-type: none"> i) RNP2; ii) RNP4; or iii) RNP10/RNAV10. 	<ul style="list-style-type: none"> a) INS/IRS; b) GNSS; c) RVSM Approved; d) ADS-B; e) At least one of the following navigation approvals: <ul style="list-style-type: none"> i) RNP4; or ii) RNP10/RNAV10; and f) HF Radio.

1.2 Flight Planning Requirements

UPRs must be constructed to comply with the following requirements:

Regarding	UPR Requirements
Airspace	<ul style="list-style-type: none"> a) UPR segments must remain within Class A airspace and are permitted in all Australian Administered Airspace which includes: <ul style="list-style-type: none"> i) YMMM (Melbourne) FIR; ii) YBBB (Brisbane) FIR; iii) AGGG (Honiara) FIR; and iv) ANAU (Nauru) FIR. b) UPRs must use published routes or approved direct route segments when transiting an active UPR Exclusion Zone defined in Part 2.

Regarding	UPR Requirements
Waypoints	<p>a) UPRs must be constructed using any combination of:</p> <ul style="list-style-type: none"> i) Published waypoints; ii) Navaids; and iii) Latitude/longitude coordinates in either whole degrees or degrees and minutes (e.g. 29S135E or 2900S13514E); <p>b) UPR segments must commence/terminate:</p> <ul style="list-style-type: none"> i) At any reporting point either on the boundary of <u>or</u> outside of an active UPR exclusion zone; except that ii) Flights departing/arriving an Australian Port, must use one of the departure/arrival gates and routes detailed in Part 3; <p>c) UPRs must include a reporting point located on <u>or</u> within 1NM of the FIR boundary between:</p> <ul style="list-style-type: none"> i) YMMM and YBBB FIRs on or west of 119°E; ii) YMMM and YBBB FIRs on or south of 36°S; and iii) An Australian Administered FIR and a foreign FIR; and <p>d) Time intervals between reporting points must not exceed 80 minutes.</p>
Exit / Re-Entry Flights	UPRs which hemstitch (exit and re-enter) between the YMMM and YBBB FIRs must not re-enter the same FIR for at least 30 minutes except within 45NM SY.
Proximity to Prohibited, Restricted, Danger (PRD) & Military Operating Areas (MOA)	UPRs must remain clear of active PRD and MOA in accordance with AIP. To remain laterally clear of active areas, UPRs must be constructed at least: <ul style="list-style-type: none"> a) 5NM in CTA; and b) 16NM in OCA; away from the area.

2 UPR Exclusion Zones

2.1 General

Due to the high density or air traffic in some parts of Australian Administered Airspace, UPR exclusion zones have been defined in these areas. UPR exclusion zones are time activated which allows aircraft operators to plan UPR segments through these areas when they are not active.

When UPR exclusion zones are active, aircraft operators must plan via published air routes or approved direct segments when transiting these areas. Approved direct segments are available in both directions H24 unless specified otherwise.

3 Gates and Routes for Departures/Arrivals

3.1 General

Flights departing/arriving an Australian Port listed in this chapter must plan using one of the departure/arrival gates and routes defined below and comply with all relevant flight planning requirements and exceptions (FPREs) listed for that aerodrome.

Flights departing an Australian Port not listed in this chapter must plan using published routes meeting any requirements detailed in [ERSA](#) for climb to planned cruising level before commencing a UPR.

Flights arriving an Australian Port not listed in this chapter must terminate a UPR prior to descent from planned cruising level and plan using published routes meeting any requirements detailed in [ERSA](#).

4.2 Change Process

4.2.1 Changes to this Manual

A new version of OARP will be published six monthly and coincide with the MAP/DAH AIRAC amendments (usually the sixth and twelfth AIRAC cycle of each calendar year). Where such versions only contain updates to align with changes to MAP/DAH and do not add/remove/amend any procedures an AIC will not be published, however the new version of OARP will be available to download from the Airservices website at <https://www.airservicesaustralia.com/industry-info/flight-briefing/off-air-route-flight-planning-options>.

When any procedures are added/removed/amended in OARP, notification will be via publication of an AIC and the new version of OARP will be available to download from the Airservices website. Such versions may coincide with the MAP/DAH AIRAC amendments or be published with effect from any other date as required.

4.2.2 Industry Requests

Aircraft operators may address feedback on the content of OARP by emailing OARP@AirservicesAustralia.com.
