1 User Preferred Routes

This manual provides aircraft operators with the requirements for planning User Preferred Routes (UPRs). Aircraft operators may use a combination of published ATS routes and UPR segments, however requirements in this manual must be adhered to in toto.

Appendices are provided at the back of this manual and are referred to throughout to assist operators by providing a visual representation of more complex flight planning requirements.

1.1 Aircraft Equipment Requirements

Aircraft operating on UPRs must have the following equipment and navigation approvals:

Within CTA Airspace	Within OCA Airspace
a) INS/IRS; b) GNSS; c) RVSM Approved; d) ADS-B; and e) At least one of the following navigation approvals: i) RNP2; ii) RNP4; or iii) RNP10/RNAV10.	a) INS/IRS; b) GNSS; c) RVSM Approved; d) ADS-B; e) At least one of the following navigation approvals: i) RNP4; or ii) RNP10/RNAV10; and f) HF Radio.

1.2 Flight Planning Requirements

UPRs must be constructed to comply with the following requirements:

Regarding	UPR Requirements
Airspace	a) UPR segments must remain within Class A airspace and are permitted in all Australian Administered Airspace which includes: i) YMMM (Melbourne) FIR; ii) YBBB (Brisbane) FIR; iii) AGGG (Honiara) FIR; and iv) ANAU (Nauru) FIR. b) UPRs must use published routes or approved direct route segments when transiting an active UPR Exclusion Zone defined in Part 2.

Regarding	UPR Requirements
Waypoints	a) UPRs must be constructed using any combination of: i) Published enroute waypoints; ii) Navaids; and iii) Latitude/longitude coordinates in either whole degrees or degrees and minutes (e.g. 29S135E or 2900S13514E); b) UPR segments must commence/terminate: i) At any reporting point either on the boundary of or outside of an active UPR exclusion zone; except that ii) Flights departing/arriving an Australian Port, must use one of the departure/arrival gates and routes detailed in Part 3; c) UPRs must include a reporting point located on or within 1NM of the FIR boundary between: i) YMMM and YBBB FIRs on or west of 119^{O}E; ii) YMMM and YBBB FIRs on or south of 36^{O}S; and iii) An Australian Administered FIR and a foreign FIR; d) Do not plan via latitude/longitude coordinates that intersect three or more FIRs; and e) Time intervals between reporting points must not exceed 80 minutes.
Exit / Re-Entry Flights	UPRs which hemstitch (exit and re-enter) between the YMMM and YBBB FIRs must not re-enter the same FIR for at least 30 minutes except within 45NM SY. UPRs must not be planned via consecutive boundary reporting points (i.e. do not plan along an FIR boundary).
Proximity to Prohibited, Restricted, Danger (PRD) & Military Operating Areas (MOA)	UPRs must remain clear of active PRD and MOA in accordance with AIP. To remain laterally clear of active areas, UPRs must be constructed at least: a) 5NM in CTA; and b) 16NM in OCA; away from the area. ***Note:*** *Published routes (including routes or DCT segments published in DAH, ERSA FPR, AIP SUP and NOTAM) which infringe these parameters but do not enter an active PRD or MOA may be planned as these routes have been specifically designed to maintain separation from the relevant PRD or MOA.*

Regarding	UPR Requirements
Indian Ocean	a) UPRs between Asia and Africa must remain on or south of air route R348; b) UPRs not entering/exiting WIIF FIR must remain on or south of air route N509 between ELATI and MALBI; c) UPRs via SABEK must remain on or south of a line SABEK BEBOG; d) UPRs via LAMOB may only be planned southbound; and e) UPRs crossing the FIR boundary between YMMM and VRMF/VCCF/WIIF FIRs must plan via a published waypoint other than TEROS.
North Australia	UPRs crossing the FIR boundary between YBBB and WAAF FIRs must plan via a published waypoint.
Great Australian Bight	a) Eastbound UPRs must not be created on or within 15NM of air route Q158 between NODUR and COBEL; and b) Westbound UPRs must not be created on or within 15NM of air route Y53 between RIDLE and ROMPA.

2 UPR Exclusion Zones

2.1 General

Due to the high density or air traffic in some parts of Australian Administered Airspace, UPR exclusion zones have been defined in these areas. UPR exclusion zones are time activated which allows aircraft operators to plan UPR segments through these areas when they are not active.

When UPR exclusion zones are active, aircraft operators must plan via published air routes or approved direct segments when transiting these areas. Approved direct segments are available in both directions H24 unless specified otherwise.

4.2 Change Process

4.2.1 Changes to this Manual

A new version of OARP will be published six monthly and coincide with the MAP/DAH AIRAC amendments (usually the sixth and twelfth AIRAC cycle of each calendar year). Where such versions only contain updates to align with changes to MAP/DAH and do not add/remove/amend any procedures an AIC will not be published, however the new version of OARP will be available to download from the Airservices website at https://www.airservicesaustralia.com/industry-info/flight-briefing/off-air-route-flight-planning-options.

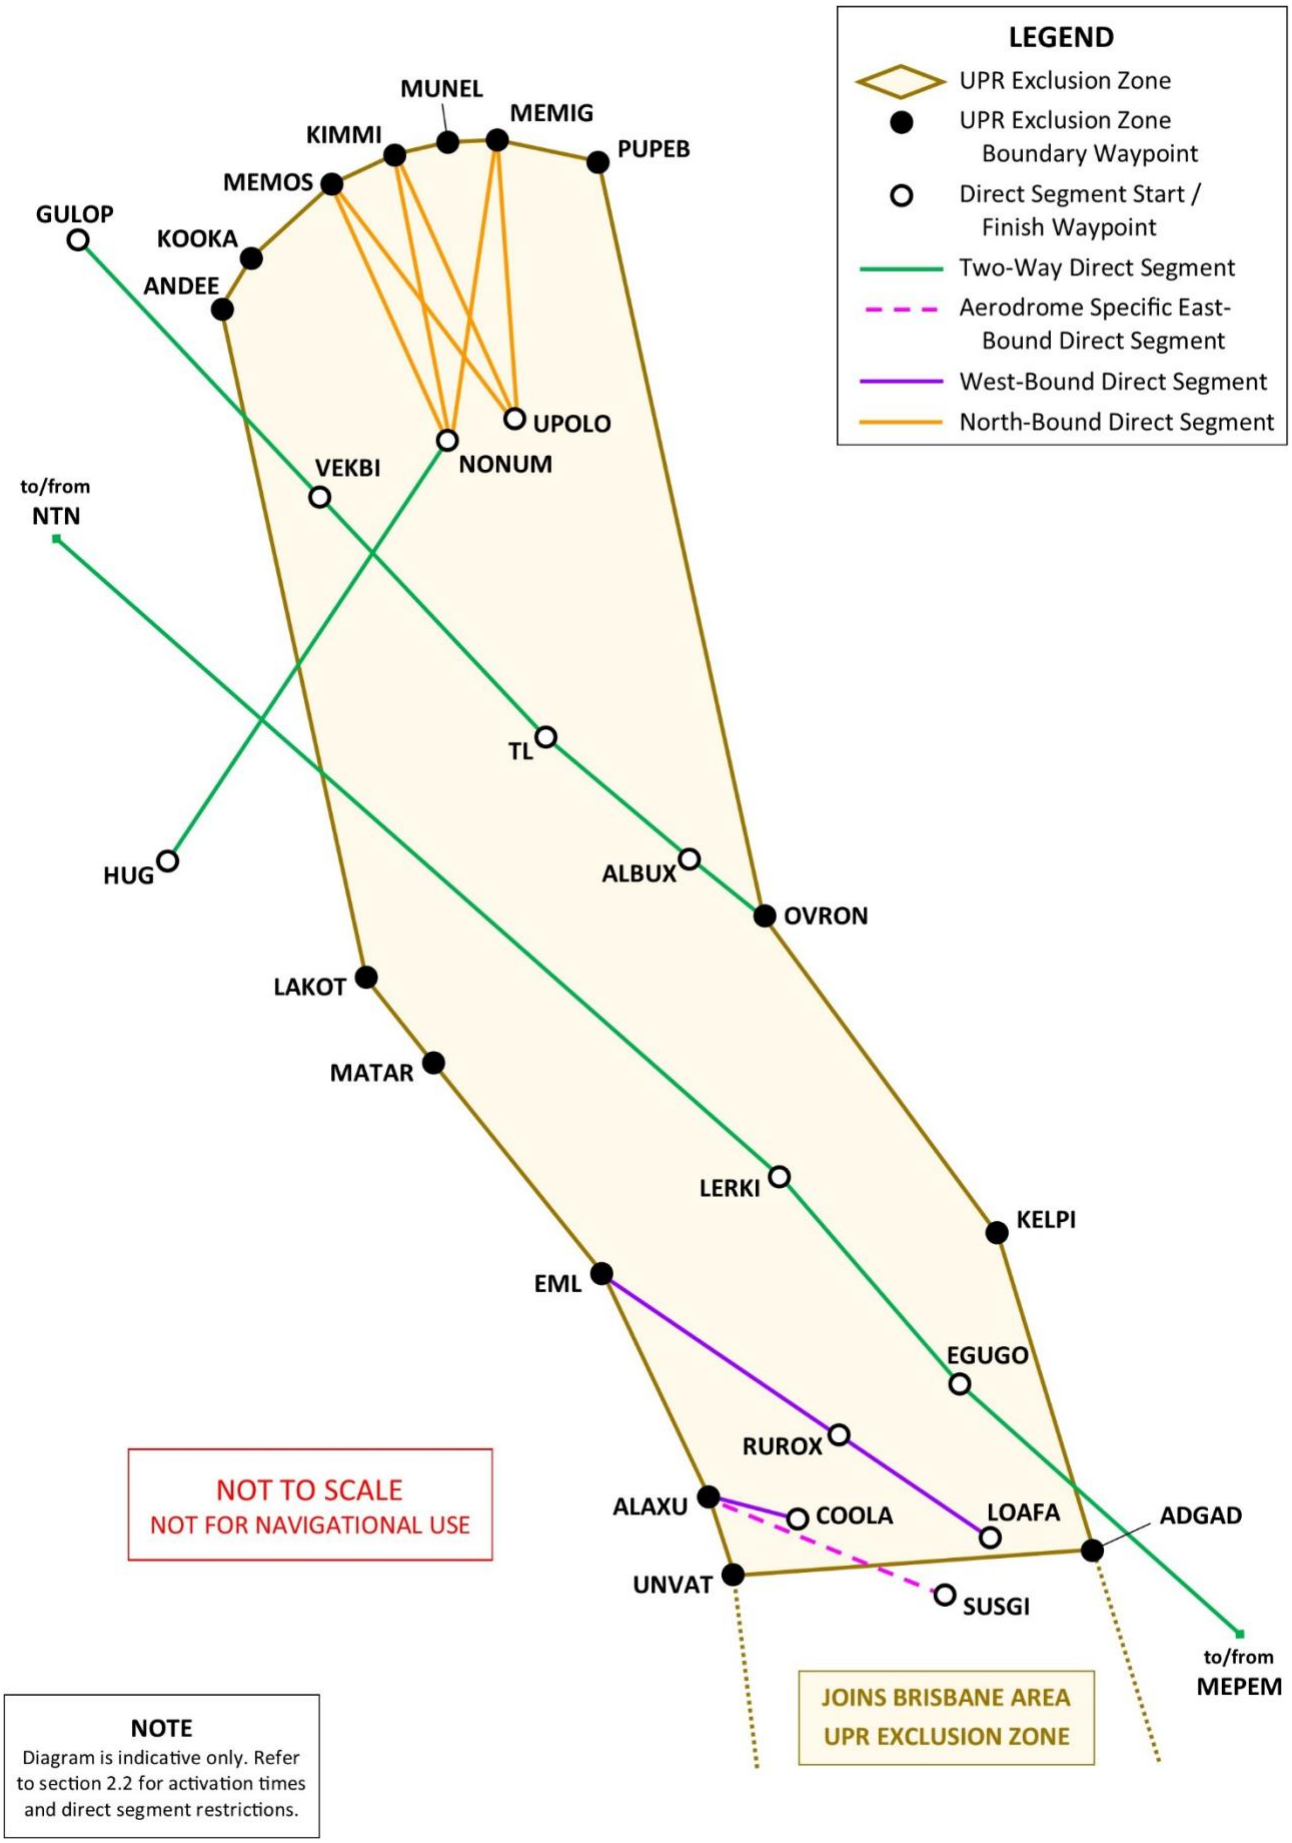

When any procedures are added/removed/amended in OARP, notification will be via publication of an AIC and the new version of OARP will be available to download from the Airservices website. Such versions may coincide with the MAP/DAH AIRAC amendments or be published with effect from any other date as required.

4.2.2 Industry Requests

Aircraft operators may address feedback on the content of OARP by emailing OARP@AirservicesAustralia.com.
