Report Notes:

- Movements are the sum of Arrivals and Circuits multiplied by 2 ie (A + C) x 2
- Arrival data is only recorded during hours of tower operation, therefore actual movements at non H24 locations may be higher than published.
- Movements at each Port reflect movements at times local to that Port, ie. a conversion from UTC time has taken place on production of the report.
- Data Source: Eurocat air traffic control system, Tower flight strips and Tower running sheets
- Data is correct as at "Report run date". Changes to data after this time may occur as a series of checks and validations occur.
- Airservices Australia takes no responsibility for the accuracy of the information contained in this Report and excludes all liability arising from any reliance placed upon it. All data is provided for informational purposes only and independent expert advice should be obtained before relying on such data.
- Services for Hobart and Cambridge airports are provided by the one Air Traffic Services facility therefore when considering statistics for ATS purposes movements for both airports should be considered.
