

Vertical Obstruction Database Order Form

Airservices can make available the Vertical Obstruction Database, which contains data on vertical obstructions in Area 1 (as defined by the International Civil Aviation Organisation). This data typically contains information on geographical coordinates and height of vertical obstacles, and the status of the verification of the data contained therein. You should be aware of the following key points related to Airservices provision of the Vertical Obstruction Database:

- The database contains unverified information, and information of varying levels of accuracy and validation.
- No warranties are made as to the accuracy or currency of the data, nor that the data is fit for any purpose.
- Airservices will not be liable for any loss, damage or injury caused by your use of the data for any purpose.

You will be required to acknowledge and agree to a supply agreement and disclaimer before you will be provided with the data. Airservices reserves the right to refuse supply of the Vertical Obstruction Database at its own discretion.
