

# RAAF AMBERLEY

## Airspace Infringement Hot Spots

RA LL = Restricted  
Airspace Lower Limit

Remain current with updated NOTAM's in order to be aware of the activation of restricted airspace and avoid infringement. Do a pre-flight NAIIPS location brief to find status of Amberley Airspace. The Amberley CTR is NOTAM'ed under 'YAMB' and R625 under 'AMX'. Remember, AMB Airspace is active on weekends (often at short notice).

RA LL 1500 ft

To remain OCTA, aircraft must track north of the northern shore of LMC, at or below 1500 ft.

Exercise caution when tracking OCTA to avoid infringement. Be aware of multiple RA LL's when entering and seek clearance if required.

Be aware of multiple airspace layers. Aircraft must remain clear of the restricted areas (in pink font) unless in receipt of a clearance. RA LL 4500 ft.

RA LL 2500 ft

Be aware of multiple RA LL when transiting to/from Toowoomba Airfield. Aircraft must comply with R625C and R625D LL of 4500 ft and 8500 ft respectively when active.

Exercise caution when operating in the vicinity of the Eastern CTR and RA boundaries. Aircraft must track east of SPMT and FPK to remain OCTA.
